

Wellness Professional Testimonials on Echo® Water Machine

"I used an ionizer in my health food store for 7+ years and would never recommend it to anyone by comparison to Echo water machine that I have used for 6+ months. I am excited that: Echo never has to be cleaned or add substances to, has substantially better filtration, has faster flow speed, is much less expensive to buy and maintain, is easier to use, has a filter indicator, does not force a particular pH, and is guaranteed forever with nothing voiding the guarantee. The biggest factor is the molecular hydrogen (H₂) dissolved in the water (all backed by science of 600+ clinical studies). Thanks to Echo's patented anti-scaling technology, there is never any calcium buildup on the cathode which would degrade or lose dissolving of molecular hydrogen into the water. H₂ is the true health factor rather than pH for which studies do not exist. I also love the beneficial energy features that Echo offers and this machine is endorsed by The Truth About Cancer – it is truly the best!" Barbara S., Sebring, FL January 2016

"As an integrative chiropractic physician for decades, I had incredible results within minutes of my first sampling of Echo hydrogen enriched water (chest expansion, spine straightening, bowel movement, and permanent elimination of inhalers for asthma). After 2 years of using Echo, benefits to me and my patients substantially exceed those of the popular ionizer I had used for the previous 8 years. By comparison, Echo costs are much less, it never has to be cleaned, water is purer with much more molecular hydrogen (the true health factor rather than pH). Echo works from the natural pH of the source water rather than inserting substances to achieve a specific pH. Echo comes with installation, a forever guarantee, 30-day return, and optional digital faucet for under-sink operation. As a bonus, Echo offers beneficial energies/frequencies so my patients can detoxify gradually and function better. Endorsed by The Truth About Cancer (TTAC) docu-series, Echo is the technology I recommend to everyone while educating them on the extreme toxicity of bottled waters because of how they are made and filled without proper cooling. Echo is affordable at zero down, \$27/month. Echo aids hydration, health, and energy for adults, children, and pets!" Dr. Kate, South Carolina, 2015

"We had been using a different ionizer for 2 years before Dr. Kate from Spartanburg, SC asked us why we weren't using echo®. We did the research and actually traveled to a Florida echo® business location and tasted the water ourselves. We immediately noticed the difference even though we had been drinking an ionizer-type water for quite a while. We brought the echo® system into our Circulation Nation® business and have not looked back. Our members and customers all started commenting on how great the taste was. Plus comments like "My skin is so much softer" or "I have so much more energy" or "those pockets of cellulite on my thighs are gone ever since we started using the echo® water" starting coming in weekly. We got so busy at our water station, that we had to install a second sink and water system to accommodate everyone coming in and purchasing the water. We never once regretted making the change, and not only were my customers happy, but our water revenue more than doubled, plus we sold 5 echo® water systems to other businesses in the area, and all of their businesses started having the same beneficial effects, both in clients' testimonies and in revenue.

When considering purchasing a water system, whether for yourself or your business, we highly recommend it."
Linda & Jim C., Owners Whole Body Rejuvenation Studio, Greer, SC

"In my 15+ years in wellness, Echo water machine resolves the crucial issue of hydration and how to easily achieve excellent health and hydration benefits in a cost-effective, maintenance free way! I was inspired to create a 6-minute youtube video titled "H₂O: The Good, Bad, & Ugly" and another 20-min hydration video at www.HydrationVideo.com. An immediate family member experienced quick results on long term heartburn by drinking hydrogen enriched Echo water and learned later about Echo H₂ tablets are a tool for trips to help keep this important health improvement." Julie P., Wellness Educator & Coach, Certified Molecular Hydrogen (H₂) Advisor, Tampa, FL
